1.	Long Term Bank Facilities	135.41 (Reduced from 142.76)	CARE A- (CE); Stable [Single A Minus (Credit Enhancement); Outlook: Stable ]#	Reaffirmed
2.	Short Term Bank Facilities	0.00	-	Reaffirmed at CARE A2+ (CE)[A Two Plus (Credit Enhancement) ] and Withdrawn@
	<b>Total Instruments</b>	<b>135.41 (Rs. One Hundred Thirty-Five Crore and Forty-One Lakhs Only)</b>		

Details of instruments/facilities in Annexure-1

# backed by unconditional & irrevocable co-obligor undertaking provided by both the entities (viz. ACME Raipur Solar Power Private Limited and ACME Odisha Solar Power Private Limited) to each other

@CARE has reaffirmed and withdrawn the outstanding ratings of 'CARE A2+ (CE)' [A Two Plus; Credit Enhancement] assigned to the short-term bank facilities of ARSPPL with immediate effect (Sr no 2). The above action has been taken at the request of ARSPPL and 'No Objection Certificate' received from the lender that have extended the facilities rated by CARE.

<b>Unsupported Rating <sup>2</sup></b>	<b>CARE BBB+ (Triple B Plus) [Reaffirmed]</b> <b>Withdrawn [Reaffirmed at CARE A2 and Withdrawn]</b>
--	---

Note: Unsupported Rating does not factor in the explicit credit enhancement

### Detailed Rationale & Key Rating Drivers for the credit enhanced debt

The ratings assigned to the bank facilities of ACME Odisha Solar Power Private Limited (AOSPPL) and ACME Raipur Solar Power Private Limited (ARSPPL) (both referred as co-obligors) continue to be based on credit enhancement in the form of irrevocable and unconditional co-obligor undertaking provided by both the entities to each other, as per which co-obligors have agreed that in the event of insufficiency of funds/shortfall in debt servicing of the Rupee Facility the lenders/lender's agent shall utilize the amounts available in their surplus account to meet such shortfall to ensure debt servicing by the due date. Given the co-obligor undertaking and the terms of the financing agreement, CARE has combined the operational and financial risk profile of AOSPPL and ARSPPL for analysis.

The ratings continue to factor in long term operational track record ranging between 5 to 5.5 years with satisfactory generation levels in both the projects; though there has been some moderation in generation in AOSPPL during FY20, long-term off-take arrangement in the form of Power Purchase Agreements (PPAs) signed with two state utilities at a fixed tariff, geographical diversity of the assets, satisfactory payment track record for both the state utilities, moderately comfortable debt service coverage indicators along with adequate liquidity built-up through various reserves including Debt Service Reserve Account (DSRA) for two quarters, contingency reserves and O&M reserves in both the projects and tie-up of working capital providing additional liquidity support. The ratings continue to factors in experienced promoters, viz, ACME Cleantech Solutions Private Limited (ACSPL) having established track record in setting up and operating solar power projects.

The ratings are, however, constrained by counter-party credit risks given relatively weak financial risk profiles of both the off-takers, though payments continue to be received in a timely manner, interest rate fluctuation risks and susceptibility of power generation to variation in climatic conditions as well as technological risks.

### Detailed Rationale & Key Rating Drivers of Unsupported Rating (ARSPPL)

The unsupported standalone rating assigned to long-term bank facility of ARSPPL factors in operational track record of more than 5 years with satisfactory generation levels, long-term PPA with CSPDCL, satisfactory payment track record since commissioning, moderately comfortable debt coverage indicators at standalone level along with adequate liquidity in the form of various reserves including DSRA equivalent to 6 months of debt servicing, fully unutilized working capital limit equivalent to

<sup>1</sup>Complete definition of the ratings assigned are available at [www.careratings.com](http://www.careratings.com) and other CARE publications

<sup>2</sup> As stipulated vide SEBI circular no SEBI/ HO/ MIRSD/ DOS3/ CIR/ P/ 2019/ 70 dated June 13, 2019. As per this circular, the suffix 'CE' (Credit Enhancement) is assigned to the ratings with explicit external credit enhancement, against the earlier used suffix 'SO' (Structured Obligation).

6 months of debt servicing, contingency reserve and O&M reserve. The rating is however constrained by counterparty credit risk as the project is exposed to relatively weak counterparty, though payments continue to be received in a timely manner, interest rate fluctuations risk and dependence on climatic conditions for power generation.

### **Rating Sensitivities**

#### **Positive Factors - Factors that could lead to positive rating action/upgrade:**

- Generation levels at better than envisaged P-90 levels of 21.16% (applicable for FY21 along with annual degradation) in Odisha project and 18.18% in Raipur project (applicable for FY21 along with annual degradation)
- Improvement in credit risk profile of both the off-takers CSPDCL & GRIDCO Limited

#### **Negative Factors- Factors that could lead to negative rating action/downgrade:**

- Lower than envisaged generation levels leading to lower cash accruals thus impacting the debt coverage indicators
- Significant deterioration in credit risk profile of off-takers viz. GRIDCO or CSPDCL leading to elongation in receivable cycle beyond 3 months
- Inability of the SPVs to meet required covenants as per the sanctioned terms leading to breach in terms of financing agreements including co-obligor undertaking

### **Detailed description of the key rating drivers**

#### **Key Rating Strengths**

##### **Co-obligor undertaking and diversification of assets:**

As per the terms of the co-obligor undertakings executed between AOSPPL and ARSPPL (co-obligors) and lenders, each of the co-obligors will provide support in the event of insufficiency of funds in debt servicing. As a result, the cash flows get comfort with respect to diversification of assets in terms of location (project spread across 2 states with 45% capacity in Odisha and 55% in Raipur), modules procured from Trina Solar, BYD and Talesun (48% modules procured from Trina Solar, 28% modules procured from BYD and remaining 24% modules procured from Talesun) as well as off-takers (53% revenue from GRIDCO Limited and 47% from Chhattisgarh State Power Distribution Company Limited). On a combined basis and standalone basis, debt coverage indicators are expected to be moderately comfortable for the tenure of term loan given generation continues to be in-line with envisaged levels and payments are being received in a timely manner.

##### **Long-term PPAs in place for both the co-obligors:**

AOSPPL is supplying power to GRIDCO Limited (GRIDCO) at a fixed tariff of Rs.7.28/ Kwh under 25-year PPA signed with the utility. ARSPPL is supplying entire power under long-term PPA to Chhattisgarh State Power Distribution Company Limited (CSPDCL) for a period of 25-year at a fixed tariff of Rs.6.46/kWh. Presence of long-term PPAs at a fixed tariff provides long-term revenue visibility for the companies. Further, the payment pattern has remained stable for both the co-obligors with AOSPPL receiving payments in about 10-15 days and ARSPPL receiving payments in about 60-70 days from raising the invoices.

##### **Satisfactory operational track record in both projects:**

AOSPPL has an operational track record of more than 5.5 years and ARSPPL has an operational track record of over 5 years. AOSPPL achieved CUF of 19.87% during FY20 as against envisaged P-90 CUF of 21.28% in 5<sup>th</sup> year of operation. The generation during FY20 was impacted in July - Sept 2019 as there was a transformer breakdown (from July 21, 2019 onwards) which affected the generation levels. The spare transformer was operationalized on August 14, 2019 and accordingly plant performance improved from September 2019 onwards. For 10MFY21 (refers to the period April 1 to January 31), the generation levels have improved in AOSPPL with Net CUF of 20.80% as against Net CUF of 19.35% for 10MFY20. ARSPPL has achieved a CUF of 17.71% during FY20 as against P-90 of 18.29% (4th year of operation). The generation levels have been relatively lower than P-90 estimates for Raipur project on account of lower solar irradiation levels. During 10MFY21, ARSPPL generated Net CUF of 17.16% as against Net CUF of 17.49% during 10MFY20. Given that the projects have single stream of cash flows through sale of power, plant performance in-line with envisaged generation levels would be critical.

##### **Moderately comfortable debt coverage indicators on combined basis:**

On account of relatively elongated repayment tenor for both the projects and healthy tariffs, the debt coverage indicators are expected to be moderately comfortable on combined basis.

##### **Experienced Management:**

ACSPL provides O&M and EPC services for solar power plants which are being setup through various SPVs under itself. As on December 2020, the group has an operational capacity of around 1669 MW spread across multiple states in India. Recently, the group successfully monetized 500 MW (AC) of operational assets under 2 separate transactions. However, overall financial

risk profile of ACME group continues to be moderate given sizeable corporate debt continues to be there along with significant exposure of the operational capacity towards state discoms having relatively weak financial risk profile.

### **Industry Outlook**

There is great thrust from Govt. for improving the share of solar power in India's overall power mix which is reflected from various policy initiatives. There had been muted solar power generation capacity additions during FY19 & FY20 on the back of imposition of safeguard duty on import of solar modules, lack of clarity w.r.to GST rate on solar modules and cancellation of large number of solar auctions. However, looking at the already allotted capacity and govt.'s push for achieving targeted solar capacity of 100 GW by end FY22, capacity additions are likely to improve in next two to three years. Solar projects have relatively lower execution risks, stable long-term revenue visibility with long term off take arrangements at a fixed tariff, minimal O&M requirements, tariffs comparable to conventional power generation, must run status of solar power projects and upward revision in solar RPO achievement targets. However, there are concerns like increased difficulties in land acquisition, inadequate grid connectivity on account of poor evacuation infrastructure, relatively lesser track record of technology in Indian conditions, lack of stricter RPO enforcement by the state regulators, very high dependence on imported solar cells and modules, regulatory haze in terms of renegotiation of tariff in concluded PPAs and cancellation of concluded auctions, weak financial risk profile of Discoms with significant delays in payment by few state Discoms, increased difficulties in debt tie-up. Overall, positive and negative developments in the sector counterbalance each other, thereby resulting in a stable outlook. Going forward key monitorable would be prices of solar modules, performance of the modules in Indian conditions, developments in claim of off-takers for renegotiation of PPAs, modalities to compensate under change in law for safeguard duty, payment pattern of off-takers, imposition of any antidumping duty by India to safeguard domestic solar module manufacturers, capacity additions of rooftop solar and regulatory stance.

### **Key Rating Weaknesses**

#### ***Relatively weak credit profile of the off-takers:***

CSPDCL, the off-taker for ARSPPL, has a relatively weak credit profile; however, the payments are being received in about 60 to 70 days as against stipulated timeline of 30 days as per PPA. Also, GRIDCO, the off-taker for AOSPPL, also has a relatively weak credit profile; however, the payments are being received in around 10 to 15 days as against stipulated timeline of 30 days as per PPA. Going forward, timely receipt of payments on a continuous basis would be a key rating sensitivity.

#### ***Climatic & Technological Risks:***

Achievement of desired CUF is subject to changes in climatic conditions, amount of degradation of modules as well as other technological risks.

#### ***Interest rate fluctuation risks:***

The term loans availed for the projects are floating rate loans and the lenders have stipulated annual reset clauses for the interest rates. However, as per the PPA, the tariff for off-take arrangement of the power is fixed, thereby, exposing the company's to risk of any change in the cost factors. The interest cost being the primary cost component on cash basis, any adverse movement in interest rate would impact the overall debt-servicing ability of the SPVs.

### **Liquidity: Adequate**

As on February 10<sup>th</sup>, 2021 ARSPPL has DSRA of Rs. 13.54 crore (equivalent to two quarter of debt servicing) created in the form of FDs. Further, ARSPPL had a cash and bank balance of Rs.12.38 crore. Apart from DSRA FDs and cash available, ARSPPL has created Contingency Reserve & O&M reserve of Rs. 2.15 crores. The company has sanctioned WC lines of Rs.11 crore which is fully unutilized as on date.

On combined levels, the co-obligor structure had DSRA balance at Rs.26.23 crore as on February, 10 2021 and surplus cash balance at Rs 19.47 crores.

As per the sanctioned terms, the co-obligors will have combined debt repayment obligations of Rs.15.27 crore and Rs.16.07 crore as against projected GCA of Rs.27.06 crore and Rs.27.80 Crore in FY21 and FY22, respectively.

#### **Impact of COVID-19:**

There has been no significant impact on the operations of the project. However, both the projects had availed moratorium from its lender on debt service obligations for period March-May'2020 (both interest and principal) which has thereby resulted in a shift in repayment schedule by one quarter. However, given the regular receipt of monthly cash flow from the discoms the company has repaid interest in June 2020 which was accrued for the months of March, April and May 2020.

### **Analytical approach:**

#### **Credit Enhanced Ratings: Combined**

ARSPPL along with ACME Odisha Solar Power Private Limited (AOSPPL) have executed co-obligor undertakings. Thus, a combined analytical approach has been taken.

## Unsupported ratings: Standalone

### About the Company – ACME Raipur Solar Power Private Limited (ARSPPL)

ACME Raipur Solar Power Private Limited (ARSPPL), a 100% subsidiary of Acme Solar Energy Private Limited (ASEPL) which is a 100% subsidiary of ACSPL, has set up a 30 MW (AC Capacity) grid connected solar photovoltaic (PV) power project in District Mahasamund, Chhattisgarh using Poly-Crystalline Silicon technology. The project achieved COD in phases on Jan 9, 2016 (for 23 MW) and Mar 15, 2016 (for 7 MW). The project was set up at a cost of Rs.207.02 crore (Rs.6.90 crore/MW) funded at debt-equity ratio of 2.98x. The company is supplying entire power to Chhattisgarh State Power Distribution Company Limited (CSPDCL) under 25-year Power Purchase Agreement (PPA), which was signed on November 5, 2014 at a fixed tariff of Rs.6.46/kWh.

**About CARE Ratings:**

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

**Disclaimer**

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating. Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
