**Subject: Press Release**

Dear Sir/Madam,

Please find attached a Press Release titled "**ACME Solar places one of India's largest Battery Energy Storage System orders of over 3.1 GWh**".

You are requested to take the same on your record.

Thanking you,

For **ACME Solar Holdings Limited**

Leading Through Innovation

## **ACME Solar places one of India's largest Battery Energy Storage System orders of over 3.1 GWh**

**Gurugram, Haryana – July 7, 2025:** ACME Solar has placed an order of more than 3.1 GWh of Battery Energy Storage System (BESS) from leading global energy system suppliers including Zhejiang Narada and Trina Energy, renowned for their high efficiency and scalable storage solutions. This marks one of the largest battery storage procurements in India to date and will support the deployment of BESS across ACME Solar's multiple renewable energy FDRE (Firm & Dispatchable Renewable Energy) and battery linked projects, scheduled for commissioning over the next 12-18 months across multiple states in India.

The delivery is planned in a phased manner over the next four to eight months of the current fiscal year. Importantly, order value of these systems is well within the budgeted cost enabling overall capex efficiency while maintaining focus on technical performance and supplier reliability. Moreover, the early procurement of these systems would accelerate execution timelines and enable timely revenue realization.

The advanced BESS equipment conforms to global standards including IEC and UL, ensuring best-in-class safety, performance and reliability. This significant order underscores ACME Solar's commitment to accelerating clean energy adoption and enhancing grid stability in one of India's fastest-growing renewable energy regions.

**About ACME Solar Holdings:** ACME Solar Holdings is a leading integrated renewable energy player with a diversified portfolio of 6,970 MW and 550 MWh spanning solar, wind, storage, FDRE and hybrid solutions. The operational capacity of ACME Solar stands at 2,890 MW with another 4,080 MW at various stages of implementation. With an in-house EPC and O&M division, the company does end-to-end development and O&M of the plants, thereby delivering projects in a time and cost-effective manner while ensuring best in class operating performance evident in its industry leading CUF and operating margins.
